Question: Demonstrate DNS and web-browsing

AIM: To be able to map using DNS and webpage data in the server.

topology:

Procedure:
1) connect the PC, server and switch as shown
2) set IP address for server and PC.
3) In the desktop menu of PC open browser and search "10.0.0.10" and auess server.
4) In the service menu of server,
   ↳ set DNS name
   ↳ Add/edit web pages
5) now after DNS naming set DNS in setting of both PC and server.
6) now we can auess the server using the name

observation:
1) we can add/edit web pages in the server.
2) DNS naming is essential and helpful.
